Sadiya-025

Education

University College of Engineering - Osmania University *2023 – Present*
BE in Computer Science and Engineering

- CGPA: 9.92 (Till Date) — SGPA: 10.0 (First Semester)
- **Coursework:** Computer Organization & Microprocessors, Data Structures, Object-Oriented Programming (Java), C Programming, Principles of Programming Languages, Basic Electronics

Indian Institute of Technology, Madras *2023 – Present*
BS in Data Science and Applications

- CGPA: 9.27
- **Coursework:** Mathematics, Statistics, Python, Java Programming, Data Structures & Algorithms, Machine Learning, Database Management, Web Development, Business Data Management, System Commands, Computational Thinking

Villa Marie Junior College for Girls *2021 – 2023*
Mathematics, Physics and Chemistry

- CGPA: 9.81

St. Mark's Progressive High School *2008 – 2021*
BE in Computer Science and Engineering

- CGPA: 10.0

Experience

Cyber Security Intern *Hybrid*
Supraja Technologies *May 2024 – Aug 2024*

- Strengthened network security, ethical hacking, and system protection skills through hands-on experience.
- Worked on developing a USB Physical Security System, aimed at preventing unauthorized USB access by controlling USB port functionality.
- Integrated MySQL database for dynamic user authentication with email-based OTP verification.
- Used Tkinter to develop the frontend and integrated XAMPP (Apache, PHP) for backend management.

Projects

MyBiome – Microbiome Health Tracker

- Developed MyBiome, an AI-driven web application that provides personalized wellness recommendations based on user lifestyle, diet, and microbiome data.
- The system leverages Machine Learning (Random Forest Classifier, 95.1% accuracy) for predictive health trends and Generative AI (Cohere API) to generate customized diet and wellness plans.
- Tech Stack: Python (Flask), SQLite, Scikit-Learn, Cohere API, Chart.js

TruthLens – Fake News Detection

- Developed an AI-driven platform to detect and verify news credibility across text, images, and videos.
- Implemented NLP models for fake news detection, CNNs and GAN detection models for manipulated media, and web scraping tools (BeautifulSoup) for real-time verification.
- Integrated fact-checking APIs and designed a MySQL database for credibility score storage.
- Achieved **99.3% accuracy** in NLP-based fake news detection and **98.7% accuracy** in deepfake image classification.
- Tech Stack: Python, Flask, BERT, CNNs, GAN detection models, BeautifulSoup, MySQL, Fact-checking APIs, Web Scraping

FlowGuard - Crowd Control System

- Developed an AI-based system to optimize crowd management using real-time data analysis and profitability factors.
- Integrated AutoCAD files for personalized crowd flow simulations.
- Tech Stack: Python, Power BI, Blender, Neural Networks

Household Services Application

- Developed a user-friendly web application that connects customers, service professionals, and administrators to streamline household service management.
- Features role-based access control, allowing customers to request services, professionals to manage assignments, and admins to oversee operations.
- Tech Stack: Python, Flask, Jinja2, Bootstrap, SQLite

My99 - News Channel Mobile App

- Developed a fully functional **React Native Mobile Application** named **My99**, a news channel platform.
- Designed an intuitive **UI** and implemented Appwrite Database for secure user authentication, data management, and real-time content updates.
- Tech Stack: React Native, Appwrite, JavaScript

Certifications & Advanced Programs

CCBP 4.0 Intensive Fellowship *2024 – Present*
NxtWave Academy

Certificate Program on Machine Learning *2024 – Present*
IIIT Hyderabad

Achievements

1st Runner-Up, HackArena 2024 - Won Rs. 50,000 in a National-Level Hackathon

1st Runner-Up, Hack Sprint (IITM - Margazhi Fest) - Secured Runner-Up position in IITM's Annual Hackathon

1st Runner-Up, VNR-VJIET Designathon 2025 - Led Team Tech Champions (Team of 3) to the Runner-Up Position

NPTEL Believer - Recognized as an **NPTEL Star** for the **July to December 2024** Semester

Other Activities

Class Representative - Osmania University

Winner - Speech Contest, Founding Day, Communication and Interpersonal Skills Club, UCEOU

Event Organizer & Content Creator - Communication and Interpersonal Skills Club, UCEOU

Graphic Designer & Content Writer - Engineers' Music and Cultural Club - UCEOU

Technical Volunteer - IEEE SB OUCE - Redesigned the IEEE SB Official website and helped grow its YouTube channel from 20 to 235+ subscribers

Educational Blogger - Runs a Scientific and Tech Blog

Technologies

Languages: C++, C, Java, SQL, Python, JavaScript, R

Technologies: HTML, CSS, Flask, React Native, MySQL, PostgreSQL, Flutter, BERT, TensorFlow, PyTorch, CNNs, OpenCV, Pandas, NumPy, Matplotlib, Seaborn, Selenium, BeautifulSoup, Microsoft Azure, AutoCAD

Tools: VS Code, Git, GitHub, Docker, Postman, XAMPP, MySQL Workbench, Canva, Power BI

MOOCS: Coursera: Google Cybersecurity Professional
